Once you attain the related certifications for the AXELOS ProPath designation, PeopleCert and AXELOS will automatically provide your AXELOS ProPath certificate.

1.5 HOW LONG ARE THE AXELOS PROPATH DESIGNATIONS VALID FOR?

The AXELOS ProPath designations are valid for as long as the component certifications for each designation are current. The AXELOS ProPath designation certificate and the component certifications in each AXELOS ProPath designation show expiry dates.

To receive the respective AXELOS ProPath designations, the candidate must have a valid Practitioner certificate for each of the component certifications. The validity of the designation is tied to the expiry of whichever product level certification expires soonest.

If a candidate holds a designation and one of the product certifications expires, they will lose the designation until they regain a valid certificate. The designation would then be re-awarded.

There are also Continuous Professional Development (CPD) routes available via [MyAxelos](#), which could allow candidates to extend the validity of their PRINCE2, PRINCE2 Agile and MSP certifications.
